DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ulich (U.S. 3,468,568).

Ulich teaches a recess component which is a stop (element 50) and a portion which cushions the end of the shaft (element 34). Ulich fails to teach a narrower entrance than receiving chamber. The instant invention claims a stop member in a sidewall, a cushioning end member and a narrow opening for the shaft. It would have been obvious to one of ordinary skill in the art to have made a compression fit at the entrance to the receiving member in order to have sealed the shaft interface and prevented contamination of the recess after insertion of the shaft.

3. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.
